

## Dear Ladies and Gentlemen,

I am delighted to welcome the organizers and all participants of the press conference “Природні фактори в оздоровленні”, dedicated to 20th anniversary of the Journal «Фітотерапія».

Unfortunately, this event is being carried out online but I am confident that quite soon it will take place in our favorite Kyiv. We are all proud that a couple of weeks ago Kyiv has reaffirmed its status of Hero City.

The role of natural factors promoting health alongside with the conventional medicine is very important in the program of prevention. For me personally, the subjects of healthy diet, nutrition and phytotherapy are of particular interest. So cordial congratulations to your journal! Let this field of medicine be prosperous and successful.

Of course, in the situation of war, which Russia waged against Ukraine, we mostly hear about military contacts and delivery of weapons. It is vital for Ukraine to prevail.

However, we should not forget about scientific and personal contacts between colleagues and to continue with future projects. It would be our step in solidarity with Ukraine.

Convening medical conferences in Kyiv after the victory is an example of our future projects. We all believe in a Ukraine's glorious victory in the war.

We look forward to receive an invitation and attend such a conference.

I wish your online conference runs smoothly. And I wish all courageous Ukrainian people a soonest victory over the enemy.

kindest regards,  
Dr. Georg Tyminski  
Chief Editor of Journal Archiv Euromedica  
Chairman of European Scientific Society, Hannover, Germany
